

ULTRA MAX

PDF 

## \$7495.00– Save over \$2500.00!!!

Ultrasound systems are the perfect way to simplify complicated audio setups.

Each of our systems includes everything you will possibly need to make your event a success with a professional plug and play audio system. Our Audio Max system is the ideal budget minded system for small to large sized crowds.

The Audio Max system is equipped with 2 built in DVD/MP3/CD players, and even karaoke hookups. First time users or experienced professionals will find that our Audio Max system is well thought out and includes all of the essential elements with the ability to upgrade or expand the system as needed. One wireless microphone is included with a stand and boom for speeches and presentations. After the event is over simply fold away and lock up your pre-assembled system and tuck it away neatly in a closet or storage area.

Save thousands of dollars when comparing this system to others in the industry that utilize almost the exact same components.

### Standard configuration equipment rack includes:

- One two channel 2600 watt professional power amplifier
- One dual 15-band graphic equalizer
- Two DVD/MP3/CD Players
- One professional rack mounted UHF wireless microphone with selectable user channels
- Two hardwire handheld corded microphones
- Two 50' Pro Style XLR Cables
- One set of Stereo Headphones
- Three Microphone stands with or without booms
- One professional rack mounted power supply/conditioner with two pull out work lights (perfect for operating equipment in dark environments)
- One ultra quiet cooling fans to keep equipment cool even in the most demanding hot weather conditions
- One Ultrasound Audio custom patch panel for easy cable connections (1 AC inlet, 2 Speakon speaker outputs, 6 XLR hardwire microphones inputs, 2 separate RCA type video outputs, and 1 stereo RCA type AUXILARY input for IPOD, PC, etc.)
- One professional 16 Channel PA mixing board mounted on a lockable pull out tray
- Locking 3" ball bearing casters for easy mobility and secure placement
- Two recessed handles
- Protective black metal corners

### All custom speaker cabinets include the following:

- One high-powered 18" professional loud speaker (25hz–2.5Khz 1300w, our competitor uses a 1250w speaker only capable of producing 25hz–600hz and does not give you enough Midrange. The result is a system that is killing your ears due to the screaming high frequencies. Our system will give your ears a rest providing equal sound distrobution across the entire frequency platform)
- One High/Mid compression driver
- One extra large horn for consistent even coverage of output
- One high-power cross-over specially engineered to give you the most natural sound and highest output
- Custom speaker grill which protects the woofer better than your standard round grills
- Two sets of Speakon speaker connection for easy connection and daisy chaining of extra cabinets(available separately)
- One cabinet houses the equipment rack and the other for storage (microphones and stands, cables, etc.)
- 4" ball bearing locking casters
- Pad-lockable latches for maximum security and keeping unauthorized users out
- Available in black or grey carpet
- Custom school logo silk screening available on speaker grills
- Easily add an extra wireless mic, CD recorder, AM/FM tuner, sets of speaker cabinets, or anything you can think of – just ask at the time of order
- 3 Year warranty on electronic components
